COPYRIGHT 1999 DERWENT INFORMATION LTD

TITLE: Moulding, especially textile laundry tablet,  
disintegrating immediately in liquid - contains fine  
cellulose particles, preferably compacted granulate of  
thermo-mechanical or chemo-thermo-mechanical pulp, as  
disintegrating agent

INVENTOR: RETTENMAIER, J O; HOLL, M ; KRUSE, H ; SCHLOSSER, H ;  
UNGERER, A

PATENT-ASSIGNEE: HERZOG S[HERZI] , RETTENMAIER & SOEHNE GMBH &  
CO J[RETTN],  
HENKEL KGAA[HENK]

PRIORITY-DATA: 1997DE-1009991 (March 11, 1997)

ABSTRACTED-PUB-NO: DE 19709991A

#### BASIC-ABSTRACT:

Moulding made by pressing powdered and/or granulated ingredients, which dissolves/disperses to release its contents as soon as it is put in liquid, contains fine cellulose particles (I) as disintegrating agent.

Also claimed is a textile laundry agent containing a solid that disintegrates in water as disintegrating agent.

USE - The mouldings are especially useful as textile laundry agent.

ADVANTAGE - Tablets for use in dishwashing machines are readily soluble in water and have the advantage of providing the correct dose. However, laundry detergents have a more complex composition and contain constituents that are not soluble in water. They also need to dissolve/disperse more quickly. Until now, only liquids, powders and granulates have given the desired results. The same applies to other compositions, e.g. textile dyes, and other liquids, e.g. alcohols. The present mouldings disintegrate rapidly in liquid, so that their contents can be dispersed.
